

Electric Rotary Shears

Chickadee II

Model D2

New and Improved

Professional Model Rotary Shear

- New state of the art voltage regulating circuitry.
- New high impact thermoplastic resin housing.
- Heavy-duty high speed Perma-Field™ motor.
- Superior craftsmanship and ergonomic design features.
- Available with optional hexagonal blade.

Eastman®

Over a Century of Cutting Expertise

Eastman has been producing rotary shears for the sewn products industry for over 50 years. We have combined our cutting experience with state of the art electronic technology to develop the most rugged rotary shear manufactured in the world. The new and improved Chickadee II has been designed for use in the most demanding global work environments, with unsurpassed dependability.

The new and improved Chickadee II, Model D2, shears through layers of fabric up to 1/2" (13 mm) thick. Fatigue is virtually eliminated due to the ergonomic construction and super light weight of less than 30 oz. (.85 kg). Our new state of the art, voltage regulating circuitry is designed for 50 Hz or 60 Hz operation and standard power sources between 110 and 240 volts. The Chickadee II is designed to operate in environments where electrical power fluctuations persist and service is unreliable. Eastman continues its relentless effort to push the limits of technology to provide superior products for your cutting room.

Contact your Eastman distributor for a professional recommendation to your cutting application.
