

The WorkerBee cordless rotary shear. Putting power and precision in your hand.

Eastman®

Over a Century of Cutting Expertise

For over a century, the Eastman Machine Company has designed and manufactured cutting machines for professionals whose livelihood depends on the quality of their equipment. Now, the company that set the standard for fabric cutting machines introduces a breakthrough in cordless cutting technology.

Designed with productivity in mind and the convenience and freedom of movement inherent in cordless tool technology. Balance and maneuverability allow the WorkerBee to buzz through your workload, without binding or tearing.

Whether you work in the textile, marine, auto, or any industry where cutting material by hand is part of your operation - the WorkerBee will become a staple in your toolbox.

The WorkerBee is a powerful, rechargeable, professional grade cordless power tool. The high torque motor and rugged cutting head allow you to cut through heavy, industrial-type materials with relative ease. The Eastman cutting head features a fixed shear plate with a spring-loaded blade to insure an effortless and clean 'scissors cut' through the lightest materials without jamming. All in a package that weighs only 2.65 lbs!

WorkerBee with Pelican Head

The Pelican Head option is designed for cutting lofty, compressible materials such as insulation and batting.

The Buzz...

- Equipped with a 2-1/32" round blade, or a choice of a 4-sided "semi-square" or octagon blade.
- The ergonomically designed handle is well suited for both left and right-handed operation.
- Adjustable blade safety guard.
- Push-button blade sharpener.
- High torque motor.
- 7.2V battery pack allows for longer run-time.
- Equipped with a charger and a spare battery for backup.
- Battery recharge time is one hour.
